

## Directions

Starting with Pencil, Draw the RED Ink in Each Step. Then Ink All Lines. Erase Pencil. Color.

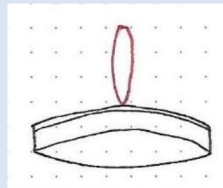

#1. In pencil, draw a shallow bowl shape with squared-off ends. Overall shape is 7 units wide and 2 units high, with one unit the height of the two sides.

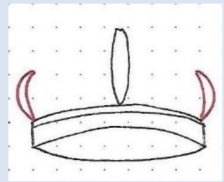

#2. Connect the two bottom corners with an arc that echoes the top line. Add a second arc to the top edge.

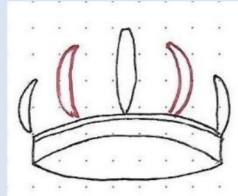

#3. Make an upright center oval that stands 3 units high.

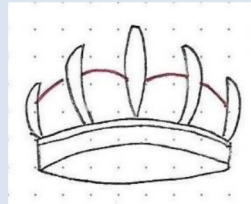

#4. Create curved parenthesis shaped units to two outside corners. These will be 2 units high.

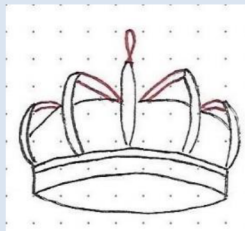

#5. Create curved parenthesis shaped units halfway between the outer ones and the center oval. These will be 3 units high.

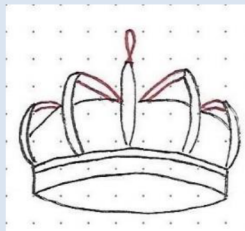

#6. Add arch to each side that continues from neat 1 unit from the top of the outer curve, across the middle side units and dips down in the center at the upright unit.

#7. Continue the front curves to reach back and behind the puffy piece aiming toward the center.

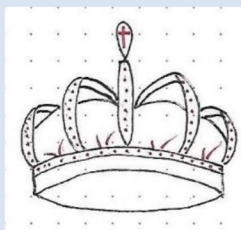

#8. Extend the center upright with an upside-down teardrop.

#9. Decorate your crown. This sample has dots as 'rhinestones' on the arches, a cross on the teardrop and tiny pleats on the velvet poof.

#11. The colored sample has added 'pearls' and stripes on the headband. An inner curve can be added to mimic the line of the front band.

#10. Erase pencil. Color.
