

#1, Pencil in guide circles. One above the other. Top one is twice as big as bottom guide circle.

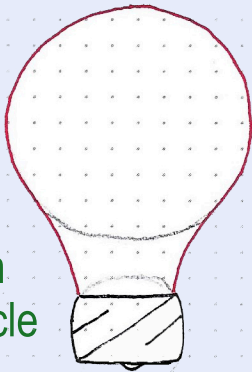

#2, On lower circle, draw horizontal lines to cut off top & bottom. Follow curve on sides. Add full diagonal & two partial ones. Make small curved electrical contact.

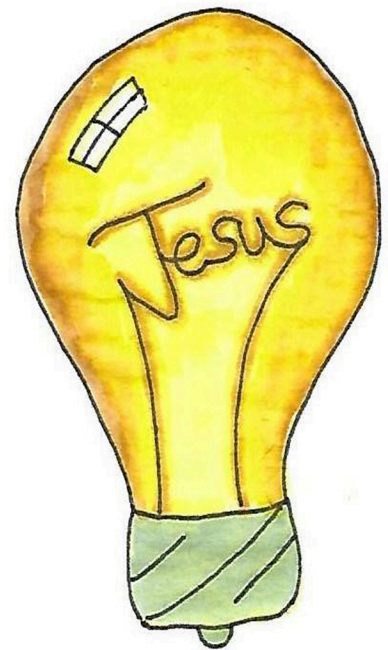

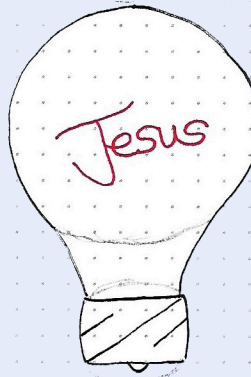

Directions

1. Starting with Pencil, Draw the RED Ink in Each Step.
2. Then Ink All Lines
3. Erase Pencil
4. Color if you wish

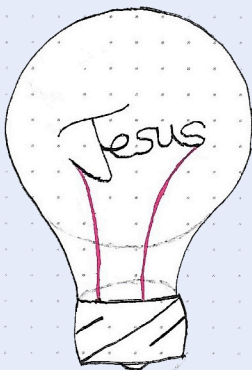

#3, Form globe from top of base bulging out to join larger circle

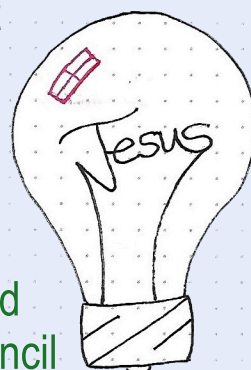

#4, Add script or other filament shape, centered in globe.

#5, Connect filament end to base with lines that echo the curve of your globe

#6, Draw reflection with curved lines at upper left (curves make the bulb look rounder)

#7 Ink and Erase Pencil

ALTERNATIVE
"FILAMENTS"
for Step #4
